Insect bites, pruritic and allergic skin disorders usually are promptly relieved with Thephorin Ointiment. This effective topical agent supplies the new and entirely different antihistamine, Thephorin, in a Carbowax base for a convenient new way of minimizing pruritus. In a typical clinical trial*, more than 75% of 305 patients with various allergic and pruritic skin disorders were relieved by Thephorin Ointment. Available in 1½-oz collapsible tubes and 1-lb jars.

A METHOD OF IMPROVING FUNCTION OF THE BOWEL

J. ARNOLD BARGEN, M.D.,
Division of Medicine, Mayo Clinic, Rochester, Minnesota

Constipation, probably the commonest of physical complaints, may be caused by several factors, singly or combined: 1. nervous fatigue and nervous tension; 2. improper intake of fluid; 3. improper dietary habits; 4. failure to heed the call to stool; 5. lack of exercise, and 6. excessive use of laxatives.

It would seem logical that correction of constipation lies in the suitable adjustment of these factors.

Any diet for relief of constipation must supply material which has limited absorption in the small intestines and which adds bulk in the colon, i.e., fruits and vegetables. Daily fluid intake, from 2.5 to 3.5 liters, is highly important. Since many people find it difficult to eat enough dietary bulk, the trend recently has been toward hydrophilous colloids.

A search was made for such a colloid, for oral use, which has little or no effect in the stomach and small intestines. Methylcellulose, appropriately prepared as Cellothyl tablets, seems to answer these criteria.

A large number of patients received 4 tablets every 4 hours, with subsequent relief of constipation. These patients had no ordinary form of constipation; they had taken quantities, or as some said, "barrels of laxatives." In the following cases of obstinate constipation of long duration, a striking change for the better followed the use of this preparation, as part of a program of general medical care:

RESULTS OF TREATMENT

- Case 1. Woman, age 57.—Obstinate constipation since early childhood. After treatment: Complete relief. She continued to pass normal, soft formed stools.
- Case 2. Nun, age 69.—Obstinate constipation of lifelong duration. After treatment: In about a week . . . soft stools.
- Case 3. Man, age 44.—Constipated many years; severe diabetes. After treatment: Normal stools at the end of one week.
- Case 4. Woman, age 62.—Very difficult evacuation after carcinoma removal. After treatment: She passed her stools without discomfort.
- Case 5. Woman, age 19.—Obstinate constipation; she had taken a laxative almost daily since early childhood. After treatment: At the end of two weeks she was passing stools daily.

COMMENT

Function of the bowel can be greatly improved by the addition of methylcellulose, appropriately prepared (Cellothyl). It represents a valuable addition to the well-ordered program of medical care.

in hypercholesterolemia

safe and effective reduction of elevated blood cholesterol with lipotropic therapy

Clinical and experimental observations indicate that lipotropic factors [choline, methionine and inositol] ... prevent or mitigate the deposition of cholesterol in the vascular walls of rabbits and chickens and seem to exert a decholesterolizing effect on atheromatous deposits in man, chickens and rabbits.

These findings suggest the therapeutic possibilities of lipotropic Methischol in the prevention and possible treatment of atherosclerosis.

methischol®

Suggested daily therapeutic dose of 3 tablespoonsful or 9 capsules contains:

Choline Dihydrogen Citrate (Choline 1 Gm.)*	2.5 Gm.			
dl-Methionine	1.0 Gm.			
Inositol	0.75 Gm.			
Liver Fractions from	36.0 Gm. liver			
*present in syrup as 1.15 Gm. choline chloride				

methischol

Supplied in bottles of 100, 250, 500 and 1000 capsules, and 16 oz. and one gallon syrup.

combines major lipotropic agents for specific therapy in reparable liver damage...cirrhosis, fat infiltration, functional impairment, toxic hepatitis, infectious hepatitis.

THIS BOOK IS

1

The first volume on Clinical use of ACTH to date.

2

A compendium of basic knowledge on adrenal gland stimulation with ACTH in the human being for researchman and practitioner.

3

The *one* book today that can keep you from becoming lost in future developments of ACTH and many areas of medical research.

PROCEEDINGS OF THE FIRST

Clinical ACTH

CONFERENCE

Edited by John R. Mote, M.D.

624 Pages

414 Illustrations

\$5.50

---- Ready March 27 ----

The First Clinical ACTH Conference, held in Chicago last fall under the auspices of Armour & Co., presented the overall factual picture of adrenal cortical function in normal human beings and patients ill with various disease syndromes.

Here is a complete report of that unique conference . . . the first of its kind ever held.

The purpose of this volume, speeded in preparation and now on press, is to give you, without delay, all that was reported and discussed.

The administration of Protamine Zinc Insulin is a cornerstone in the treatment of practically all diabetics because of its slow but prolonged effect. Unmodified Insulin is employed either as a supplement or as an alternative whenever a quick and short but powerful action is required. In emergencies and during diabetic complications, the rapidly acting preparation is especially indicated.

Mixtures of the two preparations provide an intermediate "adjustable" effect. No single Insulin preparation is indicated for all diabetics. The treatment of each diabetic is an individual problem—as individual as a fingerprint.

for rapid effect

Iletin (Insulin, Lilly), U-40 and U-80, containing 40 and 80 units per cc. respectively. Iletin (Insulin, Lilly) made from zinc-Insulin crystals, U-40 and U-80, containing 40 and 80 units per cc. respectively.

for prolonged effect

Protamine, Zinc & Iletin (Insulin, Lilly)—Protamine Zinc Insulin, Lilly—in vials containing 400 and 800 units, labeled 40 and 80 units per cc. respectively.

for intermediate effect

Suitable mixtures of Iletin (Insulin, Lilly) and Protamine, Zinc & Iletin (Insulin, Lilly).

Demonstration¹ of effectiveness of Alidase in promoting absorption of fluid subcutaneously. Hypodermoclyses with saline were started bilaterally and simultaneously, the solution for the *left* thigh contained Alidase.

Ten minutes later the absorption of 250 cc. of fluid was complete in the left thigh, that in the right required 150 minutes. Note absence of swelling on the left, its presence on the right.

ALIDASE * highly purified, well-tolerated brand of hyaluronidase—permits hypodermoclysis at intravenous speed. Alidase increases the rate of fluid absorption "twelvefold." Swelling, induration and discomfort are negligible when Alidase is employed.

SEARLE RESEARCH IN THE SERVICE OF MEDICINE

Growing in favor with physicians

Pabena* is oatmeal... and has the rich, full oatmeal flavor.

Like PABLUM,* PABENA is enriched with important vitamins and minerals and is thoroughly cooked and dried.

In addition, PABENA is valuable for infants and children who are sensitive to wheat. It is an ideal first solid food.

PABENA and PABLUM provide variety of cereal flavor that is welcomed by both mother and child.

PABENA and PABLUM, like all Mead's products, are not advertised in lay publications.

with

Chloromycetin

The cost of medication, of course, is but one item in the total cost of illness, the greatest expense stemming from the length of incapacitation and consequent loss of working time. One distinct advantage of CHLOROMYCETIN therapy is its fundamental economy-quick clinical response, reduced morbidity, shortened convalescence and earlier return of the patient to his job.

Particularly dramatic results are now obtainedin a disease such as typhoid fever, where the illness formerly ran its course for several weeks because of the lack of specific therapy. The lengthy hospitalization, special nursing care, the supportive measures during this prolonged period - all have contributed to increased costs. However, CHLOROMYCETIN changes this: the duration of illness is greatly reduced, defervescence occurring within 2 to 3 days after treatment is begun. With control of the infection, general improvement is manifest and recovery is rapid.

The high degree of efficacy of CHLOROMYCETIN has also been demonstrated in a number of other diseases previously unresponsive or poorly responsive to treatment, such as acute undulant fever, urinary tract infection, bacillary and atypical pneumonia, typhus fever, Rocky Mountain spotted fever, scrub typhus, and granuloma inguinale.

CHLOROMYCETIN (Chloramphenicol, Parke-Davis) is supplied in 0.25 Gm. Kapals.® Descriptive literature on CHLOROMYCETIN is available to physicians on

Contains Crade Cod Liver Oil, Zinc

Used effectively in GENERAL PRACTICE for the treatment of Wounds, Burns, Indolent Ulcers, Decubirus, Intertrigo, Skin Lesions, Hemorrhoids, Anal Fissures, *etc.

In PEDIATRICS for the treatment of Diaper Rash, Exanthema, Chafed and Irritated Skin caused by Urine, Excrements or Friction, Prickly Heat and in the nursery for General Infant Care.

Fatty acids and vitamins are in proper ratio, thereby producing optimum results. Non irritant, acts as an antiphlogistic, allays pain, stimulates granulation, favors epithelization. Under Desitin dressing, necrotic tissue is quickly cast off. Dressing does not adhere to the wound. In tubes 1 oz., 2 oz., 4 oz., and 1 lb. jars.

Desitin Medicinal Dusting Powder is super fatted with crude cod liver oil in a non irritating powder base. Indications: In infant care in the treatment of IRRITATED SKIN, SUPERFICIAL WOUNDS, DECUBITUS, INTERTRIGO, PRURITUS and URTICARIA. In 2 oz. Shaker-Top Cans.

ORAL PENICILLIN THERAPY

Convenient · Acceptable · Effective

In the excitement over new antibiotics and new dosage forms of penicillin, the many advantages of oral penicillin therapy may often be overlooked. Yet this is one form of penicillin therapy that is highly acceptable to most patients. Penicillin tablets are

easy to carry and easy to take—involve no painful injections nor expensive hospitalization. Recent clinical investigations have confirmed their value in many infections previously considered too serious for oral therapy.

Pfizer Tablets Buffered Potassium Penicillin G are available in foil-wrapped, hermetically sealed coverings in potencies of 50,000; 100,000; 250,000 and 500,000 units. For infants, children and aerosol therapy, Pfizer Soluble Tablets Potassium Penicillin G are available in potencies of 50,000 and 100,000 units. Troches Potassium

Penicillin G properly flavored and buffered to assure pleasant taste, are supplied in aluminum-foil strips in potencies

of 5,000, 10,000; 20,000 and 50,000 units. Available through leading pharmaceutical companies. Chas. Pfizer & Co., Inc., 630 Flushing Avenue,

Brooklyn 6, N. Y.

PHZFR QUAITTY PFIZER

Manufacturing Chemists for Over 100 Years

Actuarially so!

You needn't be an actuary or statistician to be interested in comparative rates and figures. As a physician prescribing or injecting natural estrogens, you want the best at the most reasonable cost. Consider Progynon-B.®

PROGYNON-B is estradiol benzoate, derivative of the primary ovarian estrogenic hormone itself. No other injectable estrogen can compare with it in purity, potency and clinical efficacy.

PROGYNON-B

(Estradiol Benzoate U.S.P.)

What about cost? Did you know that PROCYNON-B is available, not only in ampuls, but also in the economical, multiple dose 10 cc. vial? There is a 10 cc. vial containing 20,000 R.U. (or 3.3 mg.) per cc. An injection of 1/2 cc. from this vial delivers 10,000 R.U. or 100,000 I.U.—at a cost 1/3 less than the equivalent dosage from an ampul. With initial high dosage in this range, patients are relieved of menopausal symptoms with unusual rapidity, without untoward side effects, and at remarkably low cost.

PROCYNON-B is available in ampuls of 0.166, 0.333, 1.0 or 1.666 mg. (1000, 2000, 6000 or 10,000 R.U.), boxes of 3, 6, 50 and 100 ampuls; and in 10 cc. multiple dose vials containing 0.166, 0.333, 1.0 or 3.333 mg. (1000, 2000, 6000 or 20,000 R.U.) per cc., boxes of 1 and 6 vials.

Antiphlogistine RUB A-535

A new counter-irritant and analgesic rub in a modern specially prepared base.

ANTIPHLOGISTINE RUB A-535 has been thoroughly tested both clinically and in more than 6,000 homes. It was created for the symptomatic relief of the aches and pains of Chest Colds, Arthritis, Rheumatism, Neuritis, Sprains, Sore Muscles, and Headaches.

- RUB A535... contains four active ingredients: Camphor 1%, Menthol 1%, Oil Eucalyptus ½%, Methyl Salicylate 12%.
- A535 . . . is a counter-irritant and analgesic which stimulates local circulation and brings comforting warmth by producing active hyperaemia in the areas to which it is applied.
 - A-535 . . . has a new, modern non-greasy base which lets the product rub right in like a vanishing cream permitting instant utilization of the medications.
- RUB A-535 . . . may be used for children as well as adults. It is pure white, stainless, and has a pleasant refreshing odor.
 - A535 . . . may be used following diathermy, infra-red lamps, baking, and other forms of physio-therapy. It is ideally suited for use between office treatments.

MAY WE SEND YOU, WITH OUR COMPLIMENTS, A FULL SIZE TUBE OF RUB A-535?

R Cabbages

Once upon a time a blacksmith fell ill of a strange disorder. After eating a dish of cabbage, he fully recovered. Some weeks later his neighbor, the tailor, developed similar symptoms; cabbage was promptly administered but, alas, the tailor died. A would-be scientist in the village concluded that cabbage was a specific for the disorder, but in blacksmiths only; for tailors he pronounced it worthless and even dangerous.

The physician of today requires dependable evidence for the usefulness of his therapeutic agents. He also insists upon uniform, dependable purity for every drug that he uses.

For over 80 years physicians have relied on the uniform, dependable purity of Mallinckrodt products.
